FOR IMMEDIATE RELEASE

## The Summit Group of Companies launches Earth Fluids Inc.

**Calgary, AB** – The Summit Group of Companies is pleased to announce the launch of Earth Fluids Inc, a drilling fluids systems and products company. The Summit Group is comprised of Earth Fluids Inc., Summit Liability Solutions USA LLC., and Summit Liability Solutions Inc. Summit, incorporated in 2005, is a privately held professional environmental consulting and services company with operations in Canada, the United States and Australia. Summit is the leader in providing drilling waste management and environmental assessment services with 150 personnel and 6 offices in Western Canada.

Summit has integrated the expertise of a drilling fluids company with an environmental company to provide innovative solutions that meet critical downhole requirements and ensure regulatory compliance. The changing regulatory framework is driving the need to integrate drilling fluids with environmental expertise. The Earth Fluids division will utilize Summit's operations bases as well as a network of 15 warehouses to service our customers.

Summit's Earth Fluids Division develops custom solutions engineered to optimize operations and meet strict environmental regulations. We strive to understand our clients' goals and objectives with respect to environment, drilling, geology, reservoir and completions. This allows us to develop tailored solutions for the most demanding applications.

*"Our mission is to service our customers beyond their expectations, create a positive impact on the environment and maximize value to our employees and stakeholders."*
