## SUMMIT INNOVATION

Summit is the leader in providing innovative technologies and solutions for the management of drilling wastes. The Summit Earth™ Compliance Management System is a product of extensive research, development, and investment. This evolution in compliance management consists of the following technologies:

[Summit Earth™ Desktop](#)

[Summit Earth™ S3-S Navigator](#)

[Summit Earth™ S3-S Sump Navigator](#)

[Summit Earth™ S3-S H2O Navigator](#)

This innovative system is the evolution in compliance management combining precision GPS guidance and automation with custom web-based GIS software to control drilling waste management operations and eliminate recurring non-compliance issues. **The Summit Earth™ S3-S Navigator system is patented technology and additional information or technical presentations are available upon request.**

## SUMMIT ADVANTAGE

Summit is the leader in delivering integrated liability management solutions executed through technical expertise, innovation and regulatory involvement. In addition to drilling waste management, Summit provides additional services and solutions which are closely related or can potentially impact one another. The knowledge and expertise in these integrated services increase efficiencies and promotes cost effective turnkey solutions.
